

DATA COLLECTION & UNDERSTANDING

Entertainment Domain – Netflix Content Analysis

1. Purpose

The purpose of this document is to understand the Netflix dataset before any cleaning, transformation, or analysis. It documents the dataset source, structure, metadata, quality observations, assumptions, and limitations to ensure a controlled data preparation process.

2. Dataset Overview

Attribute	Value
Project	Netflix Content Analysis
Domain	Entertainment
Dataset Format	CSV
Number of Records	2,000
Number of Columns	16
Dataset Type	Structured
Data Source	Simulated Netflix Dataset for Data Analytics Practice
Primary Tools	Microsoft Excel, Power Query, Power BI

3. Dataset Description

The dataset contains information about Netflix movies and TV shows, including titles, content type, director, country, release year, ratings, genres, viewing metrics, language, and device type. It is designed with intentional data quality issues to simulate a real-world business dataset.

4. Data Collection Process

The dataset was prepared for analytical practice and imported as a CSV file. It contains representative entertainment data with intentional inconsistencies, duplicates, missing values, and invalid records to support end-to-end data cleaning and reporting exercises.

5. Data Dictionary

Column	Description	Data Type
show_id	Unique identifier	Text
title	Content title	Text
type	Movie or TV Show	Text
director	Director	Text
country	Country of origin	Text

date_added	Date added	Date
release_year	Release year	Whole Number
rating	Content rating	Text
duration	Runtime/Seasons	Text
genre	Genre	Text
imdb_rating	IMDb score	Decimal
views	Total views	Whole Number
watch_hours	Watch hours	Whole Number
completion_rate	Completion %	Percentage
language	Language	Text
device_type	Viewing device	Text

6. Initial Data Quality Assessment

Quality Check	Observation
Missing Values	Present
Duplicate Records	Present
Blank Cells	Present
Inconsistent Text	Movie/movie/MOVIE
Country Variations	USA, U.S., United States
Invalid IMDb Ratings	Present
Future Release Years	Present
Negative Values	Present
Extra Spaces	Present
Data Type Issues	Require validation

7. Assumptions

- Missing values will be handled using appropriate business rules.
- Duplicate records represent data quality issues.
- Future release years are considered invalid.
- Country names will be standardized before reporting.

8. Limitations

- Dataset is for learning purposes.
- No subscription or revenue data is included.
- No customer-level viewing behaviour is available.
- No real-time streaming information is included.

9. Expected Output

A validated and documented dataset ready for Power Query transformation, Power BI data modeling, KPI development, dashboard creation, and business insight generation.
