

FINAL PROJECT REPORT

Entertainment Domain – Netflix Content Analysis

Using Microsoft Excel, Power Query and Power BI

1. Executive Summary

This project demonstrates an end-to-end Business Intelligence workflow using a Netflix content dataset. The project involved data profiling in Excel, data cleaning and transformation using Power Query, data modeling and DAX development in Power BI, and the creation of an interactive dashboard for business reporting.

2. Project Lifecycle

1. Project Documentation
2. Data Collection & Understanding
3. Excel Data Profiling
4. Power Query Data Cleaning & Transformation
5. Power BI Data Modeling
6. DAX Measures & KPI Development
7. Dashboard Design & Development
8. Business Insights & Recommendations

3. Key Deliverables

Deliverable	Status
Project Documentation	Completed
Data Collection & Understanding	Completed
Excel Data Quality Assessment	Completed
Power Query Transformation Log	Completed
Power BI Data Model	Completed
DAX Measures	Completed
Interactive Dashboard	Completed
Business Insights	Completed
Business Recommendations	Completed

4. Tools & Technologies

- Microsoft Excel
- Power Query
- Microsoft Power BI
- DAX
- CSV Dataset

5. Skills Demonstrated

- Data Collection & Understanding
- Data Profiling
- Data Cleaning
- Data Transformation
- Data Modeling
- DAX Calculations
- Dashboard Design
- Business Analysis
- Data Visualization
- Business Reporting

6. Project Outcome

The project successfully transformed raw data into a structured analytical model and demonstrated how business intelligence tools can be used to identify trends, monitor KPIs, and support data-driven decisions.

7. Future Enhancements

- Integrate live streaming data.
- Include subscription and revenue analysis.
- Implement predictive analytics.
- Automate scheduled data refresh.
- Enhance dashboards with drill-through and advanced analytics.

8. Conclusion

This project provides a complete example of a Data Analyst workflow from raw data to actionable insights. It demonstrates practical skills in Excel, Power Query, Power BI, data modeling, DAX, and dashboard development.
