

DAX MEASURES & KPI DOCUMENTATION

Entertainment Domain – Netflix Content Analysis

1. Objective

This document defines the DAX measures and Key Performance Indicators (KPIs) used in the Power BI dashboard. Each measure is designed to support business reporting and answer key business questions.

2. KPI Summary

KPI	Business Purpose	Visualization
Total Titles	Total content available	Card
Total Movies	Movie count	Card
Total TV Shows	TV Show count	Card
Average IMDb Rating	Content quality indicator	Card
Total Views	Audience reach	Card
Total Watch Hours	Engagement	Card
Distinct Countries	Geographic coverage	Card
Distinct Genres	Content diversity	Card

3. DAX Measures

Measure	Sample DAX	Purpose
Total Titles	COUNTROWS('Netflix')	Business KPI
Total Movies	CALCULATE(COUNTROWS('Netflix'),'Netflix'[type]="Movie")	Business KPI
Total TV Shows	CALCULATE(COUNTROWS('Netflix'),'Netflix'[type]="TV Show")	Business KPI
Average IMDb Rating	AVERAGE('Netflix'[imdb_rating])	Business KPI
Total Views	SUM('Netflix'[views])	Business KPI
Total Watch Hours	SUM('Netflix'[watch_hours])	Business KPI
Average Completion Rate	AVERAGE('Netflix'[completion_rate])	Business KPI
Distinct Countries	DISTINCTCOUNT('Netflix'[country])	Business KPI
Distinct Genres	DISTINCTCOUNT('Netflix'[genre])	Business KPI

4. KPI Design Principles

- Use measures instead of calculated columns whenever possible.
- Keep measure names business-friendly.
- Validate each measure against the cleaned dataset.
- Use consistent number formatting.
- Reuse measures across visuals.

5. Expected Outcome

The validated DAX measures provide consistent calculations for dashboards, enabling stakeholders to monitor content distribution, audience engagement, and performance through interactive reports.
