

DASHBOARD DESIGN & VISUALIZATION DOCUMENTATION

Entertainment Domain – Netflix Content Analysis

1. Objective

This document defines the dashboard layout, visualizations, filters, KPIs, and user interaction strategy implemented in Power BI. The dashboard is designed to provide stakeholders with an intuitive view of Netflix content trends and performance.

2. Dashboard Design Principles

- Keep the layout simple and business-focused.
- Place KPI cards at the top for quick insights.
- Use consistent colors and formatting.
- Enable interactive filtering through slicers.
- Ensure every visual answers a business question.

3. Dashboard Layout

Section	Visual	Purpose
Top	KPI Cards	High-level metrics
Center Left	Donut Chart	Movies vs TV Shows
Center Right	Bar Chart	Top Genres
Middle	Line Chart	Content by Release Year
Bottom Left	Map	Country-wise Distribution
Bottom Center	Treemap	Genre Distribution
Bottom Right	Matrix	Country, Genre & Ratings
Right Panel	Slicers	Interactive filtering

4. KPI Cards

- Total Titles
- Total Movies
- Total TV Shows
- Average IMDb Rating
- Total Views
- Total Watch Hours

5. Interactive Features

- Slicers: Genre, Country, Rating, Release Year
- Cross-filtering between visuals
- Tooltips for detailed information
- Drill-down on Year hierarchy
- Reset Filters button (optional)

6. Expected Business Outcomes

- Monitor overall content distribution.
- Identify top-performing genres and countries.
- Track content growth over time.
- Support data-driven content strategy decisions.
- Enable quick executive reporting.
